Journal of Fluid Mechanics **Volume 351 25 November 1997**

O. Paireau, P. Tabeling & B. Legras A vortex subjected to a shear: an experimental study *page* 1

V. I. Nikora, A. N. Sukhodolov & P. M. Rowinski Statistical sand wave dynamics in one-directional water flows 17

J. S. Marshall & S. Krishnamoorthy On the instantaneous cutting of a columnar vortex with non-zero axial flow 41

G. F. Carnevale, O. U. Velasco Fuentes & P. Orlandi Inviscid dipole-vortex rebound from a wall or coast 75

D. G. Hurley The generation of internal waves by vibrating elliptic cylinders. Part 1. Inviscid solution 105

D. G. Hurley & G. Keady The generation of internal waves by vibrating elliptic cylinders. Part 2. Approximate viscous solution 119

C. Pozrikidis Instability of two-layer creeping flow in a channel with parallel-sided walls 139

S. Balachandar, R. Mittal & F. M. Najjar Properties of the mean recirculation region in the wakes of two-dimensional bluff bodies 167

V. P. Goncharov & V. I. Pavlov Vortex structures generated by a coastal current in harbour-like basins at large Reynolds numbers 201

J. Grue, H. A. Friis, E. Palm & P. O. Rusås A method for computing unsteady fully nonlinear interfacial waves 223

D. R. Smith & A. J. Smits The effects of successive distortions on a turbulent boundary layer in a supersonic flow 253

J. F. Harper Bubbles rising in line: why is the first approximation so bad? 289

P. L. Hansen & P. Alstrøm Perturbation theory of parametrically driven capillary waves at low viscosity 301

M. J. Marr-Lyon, D. B. Thiessen & P. L. Marston Stabilization of a cylindrical capillary bridge beyond the Rayleigh–Plateau limit using acoustic radiation pressure and active feedback 345

M. Vynnycky & I. Pop Mixed convection due to a finite horizontal flat plate embedded in a porous medium 359

BOOK REVIEWS

Fluid Mechanics, by D. Pnueli & C. Gutfinger 379

Pulses and Other Wave Processes in Fluids, by M. Kelbert & I. Sazonov 379

Computational Fluid Dynamics 1995, edited by M. Hafez & K. Ohima 380
